

GEOTAB
GO Anywhere™

Next Gen GO Anywhere

For fleets requiring simple long-life asset location tracking and theft recovery

Simplify Asset Management

The **Next Gen GO Anywhere** is engineered for high-volume fleets and the tracking of non-powered assets where scalability is paramount. Designed for stealth and simplicity, it provides a covert layer of security to prevent theft without the need for complex infrastructure. With a focus on longevity and zero-touch interaction, it delivers hourly reporting for up to 10 years, significantly lowering time-to-value through instant installation and a configuration-free setup, ensuring a rapid return on investment.

Designed for fleets requiring simple, long-life asset location tracking and theft recovery, it provides cost-effective, dependable hourly visibility for assets like roll-offs, dumpsters, and dry van trailers.

With up to 10 years of battery life, the Next Gen GO Anywhere eliminates the need for frequent battery maintenance and replacement, significantly reducing lifetime costs for a better return on investment. Improve your asset security and recovery chances with timely alerts and the flexible High Frequency Update tool. Stop guessing where your capital is, start maximizing it with the Next Gen GO Anywhere.

Why Geotab?

Low total cost of ownership

GO Anywhere's design eliminates the need for frequent battery maintenance and replacement, significantly reducing lifetime costs

Theft prevention and recovery

Improves asset security and recovery chances through timely alerts, hourly reporting, and the flexible recovery tools like High Frequency Update.

Improved visibility and asset security

Customers gain dependable hourly visibility into their asset's location, improving dispatch efficiency.

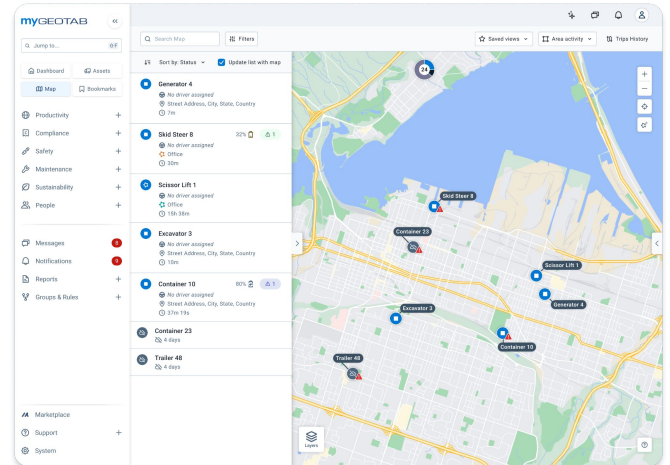

Dependable performance

Designed for prioritized reliability, all while remaining low-cost for a better return on investment.

Protect and optimize your assets with Next Gen GO Anywhere

Maximize your ROI with the Next Gen GO Anywhere, the rugged, scalable solution delivering dependable hourly reporting for up to 10 years,

- **Eliminate "Search and Rescue":** Replace manual yard checks with automated hourly reporting. Dispatchers stop hunting for trailers and start optimizing routes.
- **Lowest Total Cost of Ownership:** The "deploy once" design and 10-year battery life drastically reduce operational burden—no swapping batteries, no maintenance.
- **Tactical Asset Recovery:** Don't just track it; recover it. Locate Now and High-Frequency modes allow you to recover stolen assets quickly instead of writing them off.

Depend on high-quality reliable asset tracking

Leverage data for smarter decision making

Long life and low operational cost

Designed for hourly reporting for up to 10 years with a long-lasting internal battery

Asset location and recovery features

High Frequency mode for accelerated reporting during critical events like theft.

Durability and ruggedness

Rugged enclosure with an IP67/IP69K rating, designed to withstand harsh environmental conditions and tested against SAE J1455 standards.

Simplified user experience

Utilizes a tri-color LED for enhanced user feedback and troubleshooting capabilities with an onboard button.
